National Alliance on Mental Illness

Sharing Hope: Understanding Mental Health

Sharing Hope: Understanding Mental Health

- Toolkit based outreach and education initiative.
- A 60-minute structured presentation specifically tailored for African American congregations.

Sharing Hope Goals:

- Educate African American congregations about mental illness signs, symptoms, treatment, and support.
- Address mental health stigma in the African American community by providing scientifically-based information on mental illness.
- Increase understanding and awareness of mental health recovery by sharing lived experiences of people with mental illness, family members, and faith leaders.
- Foster dialogue in African American congregations about mental illness and how they can provide a caring and supportive environment for people with these illnesses and their families.
- Introduce NAMI education and support programs to African American congregations.

Components

- Presented by a team of 3:
 1. Person with mental illness
 2. A person that has a loved one with mental illness
 3. A faith leader with experience dealing with mental illness.
- A companion educational booklet:

Family Guide to Mental Health: What You Need to Know

Presentation

Topics

Presenters will share their lived experience with mental illness and:

- Walk participants through the major signs and symptoms of bipolar disorder, depression, and schizophrenia
- Offer an overview of recovery
- Share information on what congregations can do to provide support
- Provide information about NAMI resources

- The presentation follows the outline of this booklet.
- Presenters will read the three stories included in *A Family Guide to Mental Health: What You Need to Know*.

A Family Guide to Mental Health:
What You Need to Know
