1. METHODOLOGY
2. SURVEY FINDINGS
3. GENERAL PERCEPTIONS
4. CRISIS RESPONSE
5. 988 AWARENESS AND FUNDING
This Ipsos poll was conducted October 22-25, 2021, on behalf of the National Alliance on Mental Health (NAMI), using the KnowledgePanel®. This poll is based on a representative sample of 2,049 U.S. residents, age 18 or older. The study was conducted in English. The data were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status, household income and race/ethnicity. The demographic benchmarks came from the 2019 American Community Survey (ACS) except for the metropolitan status, which is not available from the 1-year ACS data, were obtained from the 2020 March Supplement of the Current Population Survey (CPS).

- Gender (Male, Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other or 2+ Races NonHispanic, Hispanic)
- Education (Less than High School, High School, Some College, Bachelor or higher)
- Census Region (Northeast, Midwest, South, West) by Metropolitan status (Metro, non-Metro)
- Household Income (Under $25,000, $25,000-$49,999, $50,000-$74,999, $75,000-$99,999, $100,000-$149,999, $150,000+)

The margin of sampling error is plus or minus 2.3 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of error takes into account the design effect, which was 1.16 for all adults. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.
SURVEY FINDINGS

Americans are not happy with the current state of the mental healthcare system in the United States. Many say there is significant room for improvement for mental health and suicide crisis emergency response at the national and local level.

• Three quarters of Americans (75%) say they are not content with the state of mental health treatment in this country. This is particularly true if they have been diagnosed with a mental health condition (84%).

• Discontent reaches across the political aisle, although Democrats (79%) and independents (76%) are more likely to be discontent than Republicans (68%).

• Fifty-four percent of Americans say there is significant room for improvement in addressing mental health and suicide crises, which is far lower than other medical emergency responses - where only 26% of Americans report significant improvement is needed at the macro level. Democrats (64%) and independents (56%) are far more likely than Republicans (42%) to feel significant improvement of mental health emergency responses is needed.

• At the local level, 44% of Americans say that significant is improvement is needed in their local area or state, which is on par with the level of concern for violent crime emergency responses (44%), which Americans report as a top priority issue. Just 22% say other medical emergency responses need significant improvement at the local level.
SURVEY FINDINGS

Though concerned about their own mental well-being (and even more so about their loved ones), Americans lack awareness about the mental healthcare system in this country. At this point, practically no one has heard of the 988-emergency number.

• One in three (31%) say they think about a loved one’s mental well-being often, and 40% say they think about it sometimes. This compares to 25% who say they think about their own mental well-being often, and 35% who think about it sometimes. Black and Hispanic Americans (32% each) are more likely than white Americans to say they think about their mental well-being often (22%). All racial and ethnic groups think about their loved ones in equal proportions.
• Four in five Americans say that when someone is having a mental health or suicide crisis, mental health professionals should be the first responders. Despite current practice, just 19% say they want police to respond.
• Eighty percent say a mental health or psychiatric facility would be their first choice for help if they or a loved one was considering suicide or self harm, while just 1% say they should be taken into police custody or into jail.
• Americans are almost completely unaware of the 988-emergency number. Just 1% say they are very familiar with it, and 80% report they have never heard of it.
SURVEY FINDINGS

Americans are almost completely unaware of the 988-emergency number. Just 1% say they are very familiar with, and 80% report they have never heard of it.

- Education and awareness of the 988-emergency number is needed before it’s roll out in July 2022.

Additionally, many Americans are willing to fund the 988-emergency number.

- About three in five indicate they are supportive of monthly feed/service charges to phone bills, but willingness to pay increases to 78% when given specific dollar amounts and explaining that 911 emergency service call centers are also funded as fees on monthly phone bills.
- The 20% who report they are unwilling to pay a fee report in verbatim responses that they do not object to funding the 988 emergency service call centers in principle but feel the funding should come from other areas of the government’s budget as they indicate they already pay enough money in taxes.
GENERAL PERCEPTIONS
Which three of the following issues do you find most worrying?

- COVID-19/coronavirus: 30%
- Crime or gun violence: 28%
- Climate change: 26%
- Government budget and debt: 25%
- Health care: 25%
- Immigration: 21%
- Taxes: 17%
- Racial injustice: 16%
- Social inequality: 13%
- Terrorism: 13%
- Mental health care: 12%
- Education: 10%
- Homelessness: 10%
- Unemployment: 8%
- Natural disasters: 6%
- Alcohol or drug addiction: 6%
- Other: 5%
- None of these: 4%

25%

Say issues related to the complexities of mental health are top of mind concerns.

Q. Which three of the following issues do you find most worrying? Select up to three. Base: Total (n=2,049)
Americans are thinking about the mental well-being of themselves and their loved ones, but less often than their physical well-being. One in three think about their loved one’s mental well-being often.

Q. In general, how often, if at all, would you say you think about…? Base: Total (n=2,049)
60%

Are concerned with the stigma around mental illness.
Americans are concerned about the stigma of mental illness, the mental health of a loved one, and alcohol and drug addiction.

How concerned are you, if at all, about the following issues?

% somewhat + very concerned

- Homelessness: 69%
- Racial injustice: 62%
- Stigma around mental illness: 60%
- Your loved one’s mental health: 59%
- Alcohol or drug addiction: 56%
- Your own mental health: 41%

Q. How concerned are you, if at all, about the following issues? Base: Total (n=2,049)
A majority of Americans are not well-versed in the mental health care system, and just 47% consider themselves aware of the National Suicide Prevention Lifeline.

How familiar are you with the following in the United States?

- Health care system: 81%
- Law enforcement in your community: 72%
- Criminal justice system: 65%
- Mental health care system: 49%
- National Suicide Prevention Lifeline: 47%
- Alcohol or drug treatment programs: 44%
- Housing assistance programs: 35%

Q. How familiar are you with the following in the United States? Base: Total (n=2,049)
Fewer than half of Americans view the mental health care system favorably. Many view local law enforcement positively.

Consider the current state of the following in the United States. Do you have a favorable or unfavorable view of the following?

<table>

Q. Consider the current state of the following in the United States. Do you have a favorable or unfavorable view of the following? Base: Those very familiar, somewhat familiar, not very familiar with each system: Mental health care system n=1,863; Health care system n=1,934; Criminal justice system n=1,934; Alcohol or drug treatment programs n=1,771; Law enforcement in your community n=1,957.
CRISIS RESPONSE IN AMERICA
While 7 in 10 Americans view law enforcement in their community favorably, they believe other professionals respond better to mental health, drug/alcohol and suicide crises.

Q. How well, if at all, do you think the following groups typically handle responding to mental health, alcohol/drug, or suicide crises? Total (n=2,049)

- Mental health professionals (counselors, psychiatrists, psychologists, etc.): 87%
- Paramedics/EMTs: 82%
- Doctors and nurses: 82%
- Family and friends: 53%
- Police: 45%
- People in the criminal justice system (judges, prosecutors, jail or prison administrators, etc.): 29%
76% Believe that improvement is needed in emergency responses to a mental health or suicide crisis nationally.

46% Would not feel safe calling 911 for help if their loved one were experiencing a mental health or suicide crisis.
Americans agree that emergency responses to mental health and suicide crises need improvement.

60% living in urban areas report that **significant** improvement is needed to respond to mental health and suicide crises at the national level.

Q. Consider the following emergency situations. How much improvement, if any, is needed in your state/area when it comes to the following emergency responses? Total (n=2,049)

Q. Taking into account everything you know about mental health, alcohol/drug problems, and suicide crises, would you support or oppose policies that... Base: Total (n=2,049). Shading indicates statistically significant differences.
Many believe that mental health care services should be available to those following a crisis, regardless of their ability to pay.

What type of follow up care, if any, do you think should be provided regardless of insurance coverage or ability to pay?

- Mental health care, including medication or therapy: 81%
- Alcohol or drug treatment, including rehabilitation facilities: 64%
- An assigned social worker/case worker: 51%
- Social services, like housing and food assistance: 33%
- Hospital stay: 29%
- In-home health care: 26%
- No follow up care should be available: 4%
- Refused: 1%

Q. Following an emergency intervention for someone having a mental health, alcohol/drug, or suicide crisis, what type of follow up care, if any, do you think should be provided regardless of insurance coverage or ability to pay? Select all that apply.

Total (n=2,049)
Just 31%

Of those who called 911 or had police involved in the emergency response to a mental health or suicide crisis say that they or a loved one got all of the help they needed following the event.
Three in five who have had a mental health emergency involving the police or 911 did not receive all of the help they needed.

You mentioned that you or a loved one had a mental health, alcohol/drug, or suicide crisis that involved 911 or the police. Did you or your loved one receive the help needed following this experience?

- **Yes, received all help needed**: 31%
- **Yes, received some help needed**: 40%
- **No, did not receive help needed**: 17%
- **Unsure**: 9%
- **Prefer not to say**: 3%

Those who called 911 or involved police while they or a loved one experienced a mental health crisis

---

Have you or a loved one ever done or experienced the following?

- **Seen a mental health provider for support during a difficult time**: 28% Yes, received all help needed
- **Seen a mental health provider to treat a diagnosed mental illness**: 28% Yes, received all help needed
- **Sought help for alcohol or drug addiction**: 15% Yes, received all help needed
- **Experienced a life-threatening mental health crisis (i.e., attempting suicide)**: 14% Yes, received all help needed
- **Entered an alcohol or drug treatment program**: 13% Yes, received all help needed
- **Called 911 for someone else who was having a mental health, alcohol or drug, or suicide crisis**: 8% Yes, received all help needed
- **Been to the hospital for an overdose**: 8% Yes, received some help needed
- **Been placed under an involuntarily psychiatric hold by a doctor**: 6% Yes, received some help needed
- **Called 911 while you are having a mental health, alcohol or drug, or suicide crisis**: 5% Yes, received some help needed
- **Been placed under an involuntarily psychiatric hold by a court of law**: 5% Yes, received some help needed
- **Been arrested during a mental health crisis**: 4% Yes, received some help needed

Q. Taking into account everything you know about mental health, alcohol/drug problems, and suicide crises, would you support or oppose policies that... Base: Total (n=2,049). Shading indicates statistically significant differences.
Most support funding 988, many are more supportive when informed of how the funding proposal is similar to 911 funding mechanisms. Women and Democrats are willing to pay the most, while men, Republicans and Black Americans are most likely to be resistant to fees on phone bills.

How much, if any, in fees would you be willing to pay on your monthly phone bill to fund 988 call-center operations and associated crisis response services?

Support for paying at least $1 grows, indicating many prioritize the 988 number at least as high as 911 emergency services.

Americans pay an average of $1.00 on their monthly phone bill for 911 services... How much, if any, in fees would you be willing to pay on your monthly phone bill to fund 988 call-center operations and associated crisis response services?

Q. How much, if any, in fees would you be willing to pay on your monthly phone bill to fund 988 call-center operations and associated crisis response services? Base: Total (n=2,049)
