1 in 5 U.S. adults experience mental illness each year.

431,000 adults in Mississippi have a mental health condition. That’s more than 9x the population of Biloxi.

More than half of Americans report that COVID-19 has had a negative impact on their mental health. In February 2021, 42.7% of adults in Mississippi reported symptoms of anxiety or depression. 21.1% were unable to get needed counseling or therapy.

1 in 20 U.S. adults experience serious mental illness each year. In Mississippi, 120,000 adults have a serious mental illness.

1 in 6 U.S. youth aged 6–17 experience a mental health disorder each year. 27,000 Mississippians age 12–17 have depression.

27,000 Mississippians age 12–17 have depression.

It is more important than ever to build a stronger mental health system that provides the care, support and services needed to help people build better lives.

Mississippians struggle to get the help they need.

More than half of people with a mental health condition in the U.S. did not receive any treatment in the last year.

Of the 119,000 adults in Mississippi who did not receive needed mental health care, 47.9% did not because of cost.

12.9% of people in the state are uninsured.

Mississippians are over 3x more likely to be forced out-of-network for mental health care than for primary health care — making it more difficult to find care and less affordable due to higher out-of-pocket costs.

2,375,345 people in Mississippi live in a community that does not have enough mental health professionals.

More than half of Americans report that COVID-19 has had a negative impact on their mental health.

In February 2021, 42.7% of adults in Mississippi reported symptoms of anxiety or depression. 21.1% were unable to get needed counseling or therapy.
