**President’s Report**
Adrienne Kennedy, President, expressed her appreciation for the strides forward made by the Board in their efforts around board development and continued growth as an effective body. She spoke to the board about the progress of NAMI’s movements towards becoming more data-driven – not just gathering data, but using it to drive NAMI. She highlighted the plan to reach out to committee chairs to work on creating Chair Notebooks as she will be doing for her role of President to assist with the onboarding of leaders in the next year. She also spoke about her work in the state of Texas related to criminal justice reform. There will be a session at Convention devoted to criminal justice reform: Celebrating Advancements: When the Judiciary Becomes Mental Health Advocates. External Partners currently include TX Judicial Commission on Mental Health, and Meadows Mental Health Policy Institute who is underwriting a Celebration Dinner.

**Salesforce Implementation**
Heidi Guglielmino, Director, Data Integration, NAMI, announced that NAMI360 *Powered by Salesforce* went live on February 19. The SF team was able to transfer all needed files from the previous system and is currently engaged in data cleanup. Since transfer they have been working through the expected fine-tuning of some technical aspects related to properly capturing membership transactions and the proper display of program/program leader records. They have also identified areas where more effective display of NAMI information or additional training and help resources will make it easier for users to interact with the system. The SF team plan to take advantage of pro bono support offered by Salesforce to add new features and help refine the existing system, and are eager to see how the better quality information available in the new system will help NAMI grow and improve.
