The Honorable Shelley Moore Capito
Ranking Member
Appropriations Subcommittee on Labor,
Health and Human Services, and Education
U.S. Senate
Washington, D.C. 20515

Dear Chair Aderholt, Ranking Member DeLauro, Chair Baldwin, and Ranking Member Capito:

The undersigned mental health, suicide prevention, substance use recovery, and patient advocacy organizations write to express our strong support for robust investment in the Comprehensive Suicide Prevention Program (CSP) under the Centers for Disease Control and Prevention (CDC) National Center for Injury Prevention and Control.

Recent CDC data show that more than 49,000 lives were lost to suicide in the United States in 2022, an increase in deaths of nearly 3% over 2021.¹ In 2023, 12.8 million adults aged 18 or older had serious thoughts of suicide in the past year, 3.7 million made suicide plans, and 1.5 million attempted suicide². Suicide is the 11th leading cause of death in the United States, and the third leading cause of death for youth and young adults aged 10-24, with most deaths impacting those aged 20-24.³

We understand that difficult decisions lie ahead before the finalization of the federal budget for Fiscal Year 2025 (FY25). Given the substantial impact of suicide on individuals, families, and communities across the nation each year, and the positive outcomes from the CDC's CSP Program to date, we respectfully urge you to fund the CSP at \$38 million, as provided in the Senate's LHHHS appropriations bill.

Established in 2020, the CSP currently funds 24 initiatives nationwide through cooperative agreements designed to implement and evaluate a comprehensive public health approach to suicide prevention, with a special focus on populations that are disproportionately affected by suicide. The CSP addresses the multifaceted nature of suicide through a range of innovative and effective strategies, employing a framework using data-driven methods to tackle the problem through different approaches tailored to each population. These approaches include community-based prevention programs, research

into effective suicide prevention strategies, and implementation of best practices. Through collaborations with local organizations, the CSP also supports suicide prevention training for community leaders, educators, and health professionals. This ensures that suicide prevention efforts are both localized and scalable, addressing the unique needs of different communities while fostering a culture of support and resilience.

These CSP initiatives have led to significant benefits, including decreases in suicide rates and increased training, awareness, and data collection. CSP investments, for example, have resulted in a 6.5% reduction in suicide rates from 2019-2021 among veterans and servicemembers served by CSP initiatives.⁴ In Connecticut, the CSP's focus on youth ages 10-24 contributed to a 20% reduction in suicide rate for this population.⁵ In Tennessee and Vermont, where the CSP focuses programming on rural populations, there has been an 8.76% and 3.64% decrease in suicide rates, respectively.⁶ In North Carolina in 2023, the CSP team implemented Faith Leaders for Life (FLFL) training to supplement the mental health provider workforce shortage, training 43 clergy and faith leaders who reach an estimated 24,000 congregants in North Carolina.⁷ Georgia's CSP team focused on collecting vital data on first responders and military veterans in the state and their access to health and suicide prevention resources.⁸ This data then served as the basis for educational training and informative materials to raise awareness among first responders and veterans, their families, and communities.

By promoting mental health awareness, encouraging early intervention, and supporting individuals in crisis, the CSP plays a pivotal role in addressing one of the most serious public health challenges of our time. We urge you to provide robust funding for the CSP to save lives and foster hope, and we thank you for ensuring the health, safety, and wellbeing of all Americans through the FY25 appropriations process.

Sincerely,
